

## Home Screen Orientation

Below is the homepage layout.

1. The menu on the left contains all accessible sections of the system that can be accessed at any time. It also contains the log-out, refresh, profile, and switch to mobile. This menu can be collapsed by the arrow at the top.
2. The center of the page shows the most commonly used sections of the system, including “Protocols”, “Animal Orders” and “Animal Management.” IACUC and IBC protocols can be found and/or created in the “Protocols” section.
